

Technical Support Analyst Co-op (Highland Valley Copper)

Application Deadline: Monday, June 3, 2024 (we will review applications on a rolling-basis)

Duration: 8 months

Positions Available: 1

Start Date: Monday, September 9, 2024

For this exciting position, we are specifically targeting students who have a background in Computer Science, Information Systems or Engineering (Computer, Software) and have experience working on hardware and networks. Depending on the needs and location of the team, you will need to work PDT or MDT or relocate to a specific office (site-based). Proof of a valid work permit will also be required, if applicable.

Don't miss out on this exciting opportunity to be part of one of Canada's leading mining companies and join our team!

Why consider Teck Resources Ltd. for your Co-op Placement?

At Teck, we offer more than just a job – we provide a comprehensive student experience comprised of relevant, hands-on work, vibrant social activities, extensive networking opportunities, and rich professional development. With captivating projects set against stunning backdrops, a culture of inclusivity and collaboration, and boundless opportunities to learn, grow, and have fun, joining us means embracing a fulfilling and dynamic co-op adventure.

In addition to excellent compensation, Teck co-ops receive a variety of advantages including but not limited to:

- Financial assistance to help with travel costs and co-op fees
- Opportunity to develop technical skills and gain practical experience while applying academic knowledge to real-world mining operations and projects
- Enjoy mentorship and guidance from experienced specialists in their respective fields
- Receive primary consideration for professional positions upon graduation

Responsibilities

- Be a courageous safety leader, adhere to and sponsor safety and environmental rules and procedures

- Collaborate with a team to continually improve the current mining systems across the operations to improve production, quality, reliability, accessibility, and credibility of Teck Digital Systems
- Deploy and maintain end-user hardware
- Build and evaluate innovative ideas and technologies to help improve the way we do business
- Collaborate with help desk and network operations teams to determine and resolve end user issues
- Plan, coordinate, and communicate all system changes

Qualifications

- Background in Computer Science, Information Systems or Engineering (Computer, Software) is required
- Drivers license and access to a vehicle is required throughout the work term
- Experience with working with networks and hardware is an asset
- Previous work experience in a technical environment is preferred
- Motivated self-starters with the ability to manage several projects simultaneously
- Comfortable working in a multi-faceted work environment with a willingness to work outdoors. Some positions will be required to operate vehicles at our operations

All students will be required to complete pre-employment drug testing prior to commencing work.

Wage Range: \$3900 - \$5000 / Month

Salary is commensurate with the number of academic semesters and prior co-op experiences completed.
