

Environmental Coordinator
Teck Highland Valley Copper
Posting Date: XXXX 2022

Closing Date: XXXX, 2022

Are you interested in joining a dynamic and passionate team in the field of Environmental Management?

Reporting to the Senior Environmental Coordinator, the Environmental Coordinator is responsible for implementing, supporting, and improving waste management programs at HVC. This position is responsible for coordination and delivery of waste management activities and spill response on-site, including oversight of HVC's landfill and soil treatment facilities, recycling, hazardous waste, contaminated sites, air and dust monitoring, and associated planning, inspection, and reporting activities.

To be successful we are looking for someone with outstanding organizational, interpersonal, and communication skills, who can effectively collaborate with regulators and partners with varying backgrounds, and at different seniority levels. Someone who is a self-starter, has strong problem-solving skills and can prioritize contending demands.

This is an exciting opportunity for a specialist in one or more aspects of waste management with a broad general skill set. You will gain broad exposure to multiple departments and activities within our operations.

Join us in the Highland Valley and enjoy a variety of recreational opportunities, such as hiking, skiing, fishing, and golf! The mine site is a 50-minute drive from Kamloops, B.C. which provides all of the comforts of city living. The mine site is also close to Merritt, Ashcroft, and Logan Lake, which all exude a small town community atmosphere.

Responsibilities:

- Be a courageous safety leader, adhere to and sponsor safety and environmental rules and procedures
- Work with other departments and Teck's corporate office to advance environmental stewardship across the mine site
- Support site compliance through development and maintenance of procedures and policies
- Coordinate environmental reporting requirements under various permits and legislation related to waste management, air quality, contaminated sites and spill reporting.
- Conduct field environmental inspections
- Support environmental incident investigations
- Support responsible production strategic priorities and goals under Teck's Sustainability Strategy
- Accountable for developing, implementing, and tracking budgets on an annual basis, and providing input and advice on budget decisions and allocations
- Complete other responsibilities as assigned or required.

Qualifications:

- A degree in law, science or engineering.
- Minimum two years' experience in mining, resource development, industrial operations, environmental management, environmental assessment, or regulatory field would be an asset.
- Knowledge of relevant legislation, standards, and effective industry best practices.
- Ability to implement, support, and improve environmental programs.
- Ability to interpret relevant legislation and thereafter implement necessary changes.
- Experience managing contractors.
- Experience with environmental auditing, particularly for International Standards Organizations (ISO) 14001 environmental standard, is an asset, but training will be provided.
- Strong organizational (including time management), interpersonal and communication skills and attention to detail.
- Ability to work independently as well as collaboratively and productively as a team member and with external communities of interest including regulatory agencies and Indigenous groups.
- Ability to organize priorities based on deadlines and strong attention to detail.

At Teck, we value diversity. Our teams work collaboratively and respect each person's unique perspective and contribution.

Qualified applicants interested in joining a dynamic team are encouraged to submit a resume and cover letter electronically.

We wish to thank all applicants for their interest and effort in applying for the position; however, only candidates selected for interviews will be contacted.

Teck is a diversified resource company committed to responsible mining and mineral development with major business units focused on copper, steelmaking coal and zinc, as well as investments in energy assets.

Headquartered in Vancouver, Canada, its shares are listed on the Toronto Stock Exchange under the symbols TECK.A and TECK.B and the New York Stock Exchange under the symbol TECK.
